Profile

Experienced in integrating appropriate technologies into website designs to meet demands of clients. Looking to secure a long-term graduate(technical) role with a leading firm where I can aid organization growth and further develop my skills.

Education

	Mass Communication
Calabar, Nigeria	Cross River University of Technology
2024/04 – 2024/09	Software Development
Lagos, Nigeria	GoMyCode

Projects

Party Cake

Worked on an app (Party Cake) from using html, CSS, bootstrap for front-end and React on the server side, with MySQL to communicate with database. Implemented all front end form validations including signup and login using JavaScript. Currently working on other functionality, responsiveness.

A front-end mini project

Designed a personal static portfolio made it responsive with CSS and media query, implemented some bootstrap properties like Carousel, Modal, Accordions. Also added some font awesome icons.

JavaScript result checker

Implemented and designed a result checker with pure JavaScript. It gives the user automated feedback as needed after filling in their scores. An updated version of this project has been used By Diamond Hall school for faster and more efficient feedback on students reports card.
